Mahiran Digital Sdn Bhd

- Managing and handling the mobile team's project to distribute to the employees.
- Helping the junior developer for the mobile application development

Junior Flutter Developer July 2021 until Dec 2022
Mahiran Digital Sdn Bhd

- Designed the mobile applications interface.
- Developed the connection of the interface with the API Hosting

SKILLS

Technical Skills

- Flutter Dart
- SQL
- JSON
- Laravel
- Git
- Php
- Figma
- React JS
- Vite
- Vue JS
- Spring Boot
- Redis
- TypeScript
- Docker
- Python
- FastAPI

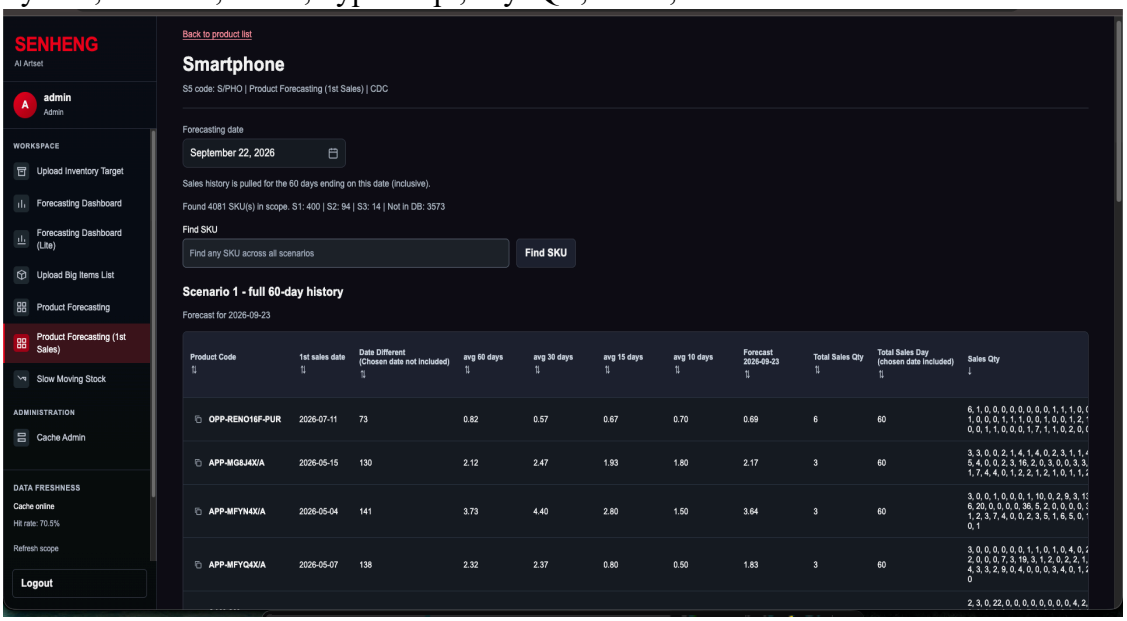

Leadership Skills

- Project Leader Developer**,** AUF MBZ Consortium Mobile Application, December 2022 until 2024
- Project Manager, Private Nursing Home Mobile Application, March 2023 until 2024
- Project Manage, Mysztech POS System January 2024 until December 2025
- Project Manager, Cloone360 (Ticketing System) December 2025 until presents
- Leader Developer, HRMS (HR System) September 2026 until presents

PROJECTS

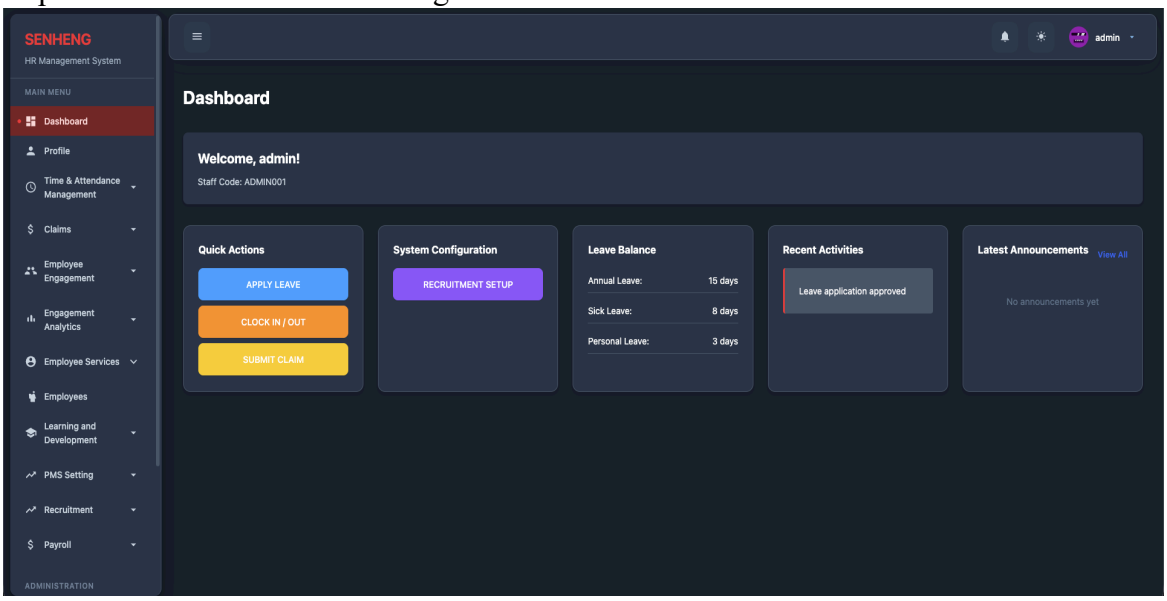

Stock Prediction System for Senheng (SH AI ARTSET)

- AI demand forecasting and auto-replenishment platform for retail electronics chain, predicting per-branch demand and recommending stock levels
- Built the Python pipeline (data extraction, weather-enriched forecasting, replenishment optimization) that running every night vio cron job from the server
- Migrated the old cold structure to a new clean-architecture.
- Containerised with Docker to deploy it in a Linux server
- Implemented a rule-based demand forecast that blends short-term and long-term sales trends, computed live from sales and transfer data
- Python, FastAPI, React, TypeScript, MySQL, Redis, Docker

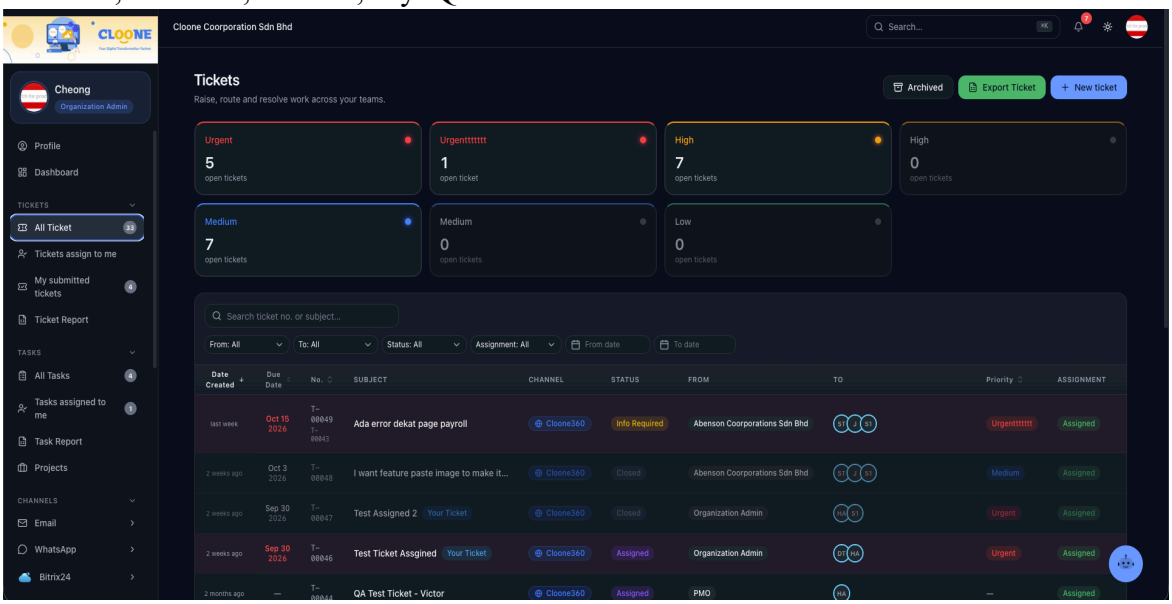

Human Resource Management System for Senheng (HRMS)

- A web-based HR management system for Senheng with some modules like Learning Management System
- Consolidated three inconsistent axios setup into one client with silent token refresh 401.
- Built reusable UI components
- Installable as a PWA with Java Spring Boot behind it as the backend
- Use Vue 3 and Vite as the frontend
- Deployed to a Linux server with CI/CD pipeline and enabled the automated update with github action
- Implement service-worker caching issues that left users on stale builds

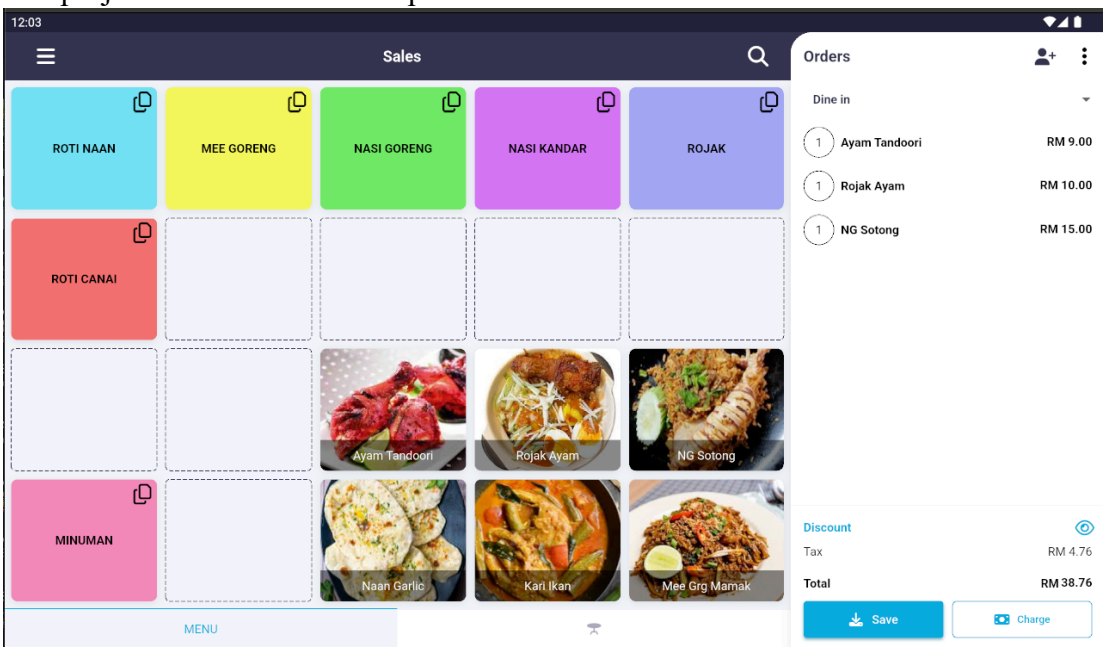

Multi-Tenant Ticketing System (Cloone360)

- A web-based ticketing system with AI integrated for internal staff and customer company
- A lead developer for the web structure, code architecture.
- Monthly meeting with the PMO for the progress update
- Deployed the web application on a Plesk server with a CI/CD pipeline, enabling automated, repeatable releases and removing manual FTP uploads.
- React JS, Three JS, Laravel, MySQL

POS System Mobile Application for Myzstech Sdn Bhd

- A pos system software for managing sales, payments and restaurants
- Design the UI/UX, implement local database and live update using pusher service
- Monthly meeting with the client for progress update
- Flutter, Postman, PHP, Pusher
- The project is still in the development

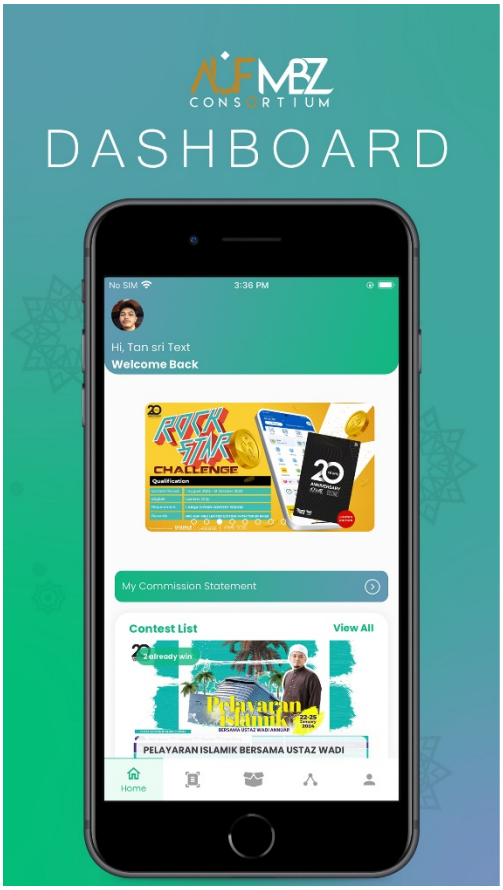

Website Based Registration System for IFCEM 2024

- A web application for registration with admin panel for BOMBA event in 2024
- Design the interface, data dictionary and functionality of the web application.
- Weekly meeting with BOMBA for progress update
- Laravel, PHP, MySQL
- The system has been closed due to expired

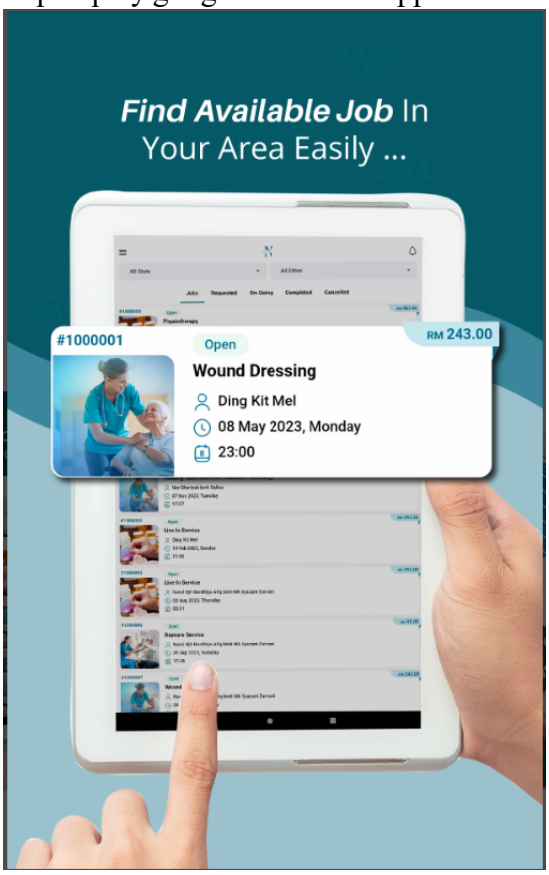

AUF Consortium Mobile Application System (AUFMBZ)

- Admin system and mobile app system for user to record and track their sales, downlines and more.
- Design the interface and the functionality of the mobile application.
- Monthly meeting with AUFMBZ staff for progress update.
- Upload the app to the Play Store and Apps Store
- Flutter, MySQL, Web API**,** Pusher, Firebase Cloud Messaging
- The project has been closed due to client problem

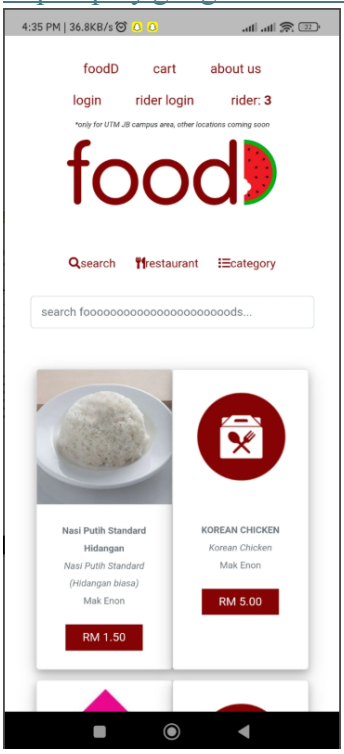

Private Nurse to Home (Nurse2u)

- Mobile app system for client to hire a nurse for their patient, to seek job for nurse and to record and track their job, patients, client, nurse and more.
- Design the interface and the functionality of the mobile application.
- Upload the app to the Play Store and Apps Store.
- Flutter, MySQL, Web API , Pusher, Firebase Cloud Messaging
- https://play.google.com/store/apps/details?id=com.nurse2u.asia&hl=en&pli=1

FoodD

- Mobile app system for student and food seller and rider to buy food, sell food, and deliver food around university campus
- Load the webview in the app that made by the client
- Implement foreground and background notification from the webview
- Upload to the Play Store and Apps Store
- Flutter, Pusher, Firebase Cloud Messaging
- https://play.google.com/store/apps/details?id=com.foodd.utmholdings&hl=en

Class Attendance using NFC and QR Code (SCANFC)

- Mobile app system for student and lecturer to create class, submit attendance and record attendance of the students using NFC and QR Code
- Design the interface and the functionality of the mobile application.
- Flutter, MySQL, Web API

Authentication and self-recovery using a new pdf (MyPdf)

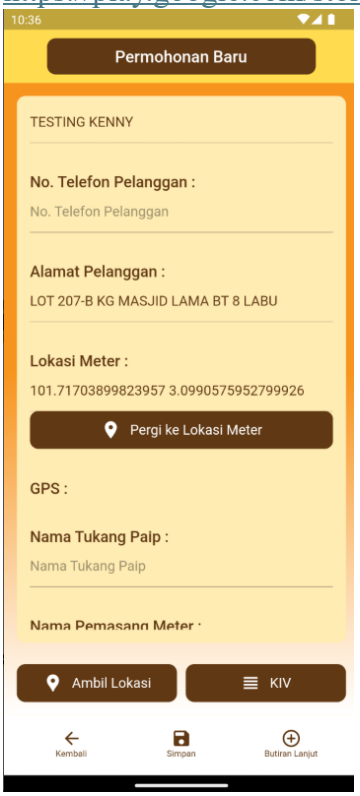

- Mobile app system for user to encrypt their pdf using watermark key algorithm
- Design the interface and the functionality of the mobile application.
- Upload the app to the Play Store and Apps Store.
- Flutter, MySQL, Web API

Authentication and self-recovery using a new image (Ausr)

- Mobile app system for user to encrypt their image using watermark key algorithm
- Design the interface and the functionality of the mobile application.
- Upload the app to the Play Store and Apps Store.
- Flutter, MySQL, Web API

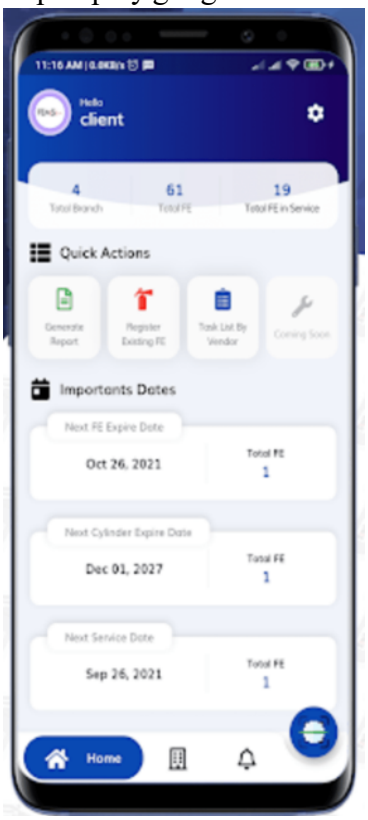

METIS

- Mobile app for contractor that work with Syarikat Air Negeri Sembilan (SAINS) to manage pipes around Negeri Sembilan
- Update the interface and the functionality of the mobile app
- Upload the app to the Play store and the Apps Store
- Flutter, MySQL
- https://play.google.com/store/apps/details?id=com.metis.sains.metis_sains&hl=en

Fire Audit

- Mobile app system for fire contractor and building owner to service and keep record tracking of fire extinguisher and fire equipment system using NFC and OCR Image • Design the interface and the functionality of the mobile application.
- Offline database for fire contractor to do the inspection
- Upload the app to the Play Store and Apps Store.
- Flutter, MySQL, Web API
- https://play.google.com/store/apps/details?id=com.md.fireaudit&hl=en
